PAPANAIDU PADAKANDLA

Machine Learning & Data Science Engineer | AI-Assisted Development

Bengaluru, India (open to relocation & remote) | +91 99481 71074 | mrnaidu2920@gmail.com

linkedin.com/in/padakandla-papanaidu | github.com/papanaidu

PROFESSIONAL SUMMARY

Machine Learning & Data Science graduate with hands-on experience in Python, ML model development, NLP, and Power BI reporting, backed by three internships and AWS certifications in ML and Data Analytics. Builds high-accuracy ML systems, turns data into actionable insights, and uses modern AI tools (Claude, Claude Code, Codex, Antigravity, Gemini, ChatGPT) to build, deploy and maintain applications end to end. Seeking global opportunities in AI, Machine Learning and Data Analytics.

TECHNICAL SKILLS

Programming & Data	Python, SQL, PySpark, Excel
Machine Learning & AI	Machine Learning, NLP, Deep Learning, Statistical Modeling, Random Forest, XGBoost, Logistic Regression, Computer Vision (OpenCV)
Data Visualization	Power BI, Matplotlib, Seaborn
AI Coding Tools	Claude, Claude Code, Antigravity, Codex (hands-on)
Generative AI & Content	Gemini, Flow, ChatGPT, Claude for image, video and content creation
Deployment & Hosting	Built apps and websites, hosted on cloud / VPS servers and maintained independently
Cloud	AWS (ML Specialty and Data Analytics Specialty certified)

PROFESSIONAL EXPERIENCE

Machine Learning Intern | Hubble Mind Labs, Bengaluru, Karnataka

- Developed and optimized machine learning models while contributing to real-time projects.
- Gained hands-on experience across the model development lifecycle in a production-focused team.

Data Science Intern | 42 Learn

- Executed predictive modeling, data visualization and real-life case analysis.

Machine Learning Intern | CodeTantra

- Implemented machine learning algorithms in Python.
- Collaborated on deployment-ready models.

PROJECTS

Hypertension Risk Prediction (ML)

- Built an efficient, data-driven ML model for hypertension risk prediction using Random Forest and XGBoost, achieving high accuracy through optimized feature selection and data preprocessing.

Fake Online Reviews Detection (NLP)

- Achieved 90%+ accuracy with NLP and Logistic Regression; automated review flagging reduced manual effort by 60%.

Real-Time Sign Language Detection (Computer Vision)

- Designed an OpenCV-based gesture recognition system enabling real-time accessibility support.

Amazon Bestseller Analysis (Power BI)

- Built Power BI dashboards analyzing 1,000+ books; improved dataset reliability by 30% through cleaning and transformation.

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML) | PACE Institute of Technology & Sciences | CGPA: 6.93 / 10

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty
- AWS Certified Data Analytics – Specialty
- PCAP – Certified Associate Python Programmer (Cisco)
- CodeTantra – Python
- Infosys Springboard – AI, NLP & Deep Learning

ACHIEVEMENTS & ACTIVITIES

- Demonstrated Real-Time Sign Language Detection at QIS Expo; presented a poster on Social Media Awareness.
- Participated in AI workshops (NXTWAVE).

WORK READINESS

- Own laptop for the internship; stable internet and power backup for uninterrupted remote work.
